# PowderChamp PowderChamp

Optical impressions  
with the CAD/CAM  
technology

for the  
CEREC®  
procedure

- Even powder application
- Fine adjustable air pressure
- Independant from office installation due to the silent motorized compressor
- Regulation of air pressure with dosage lever and reduction valve
- Additional container for trouble free application
- Fast coupling for the additional container
- Avoidance of breakable plastic canulas
- Highest fine-mechanical quality
- Airflow dehydration through two water separators
- Free of annoying and dangerous propellant gas
- Transportable to different work areas
- Turbine hose is not occupied
- Handpiece/ container fully sterilizable
- No follow-up costs
- Three-year warranty

Two water separators and an easy adjustable reduction valve for fine dispensable and absolute dry air pressure.
